PUNCH HOLDER FOR D16 PRESS (DIAM 2 TO DIAM 30)

38,78 € excl. tax
46,54 € incl. tax

Made in France

SKU: JLBM30PRESSE | **Categories:** [Press adaptors](#), [Striking tools and accessories for hollow punches](#) |

DESCRIPTION DU PRODUIT

This system enables BOEHM JLB model punches to be attached to a press, while retaining the twin system. This part features a ramp system for locking punches from Diam2 to 30 mm. The part is secured by an M8 set screw in a Diam16 hole (see part drawing).

Press compatibility

This part is compatible with EMG manual rack presses 3HR, 4HR, 14HR and 50HR, as well as toggle presses 7HR, 15HR, 15 HR LP, 20HR and 20HR LP, or any other press with a 16 mm diameter bore.

Other informations

Hollow punches cutting with a press requires certain precautions. It's important to ensure that the

30) - Référence : JLBM30PRESSE

press used provides the necessary power with a slow movement, and that the cutting support is suitable.

We also offer a fully equipped manual press ready for use with our tools. You can find it [here](#)
