SPECIAL 10 MM DIAMETER PUNCH WITH PIN

21,96 € excl. tax
26,35 € incl. tax

Made in France

SKU: JLB10ERG | **Categories:** [Special hollow punches](#) |

DESCRIPTION DU PRODUIT

This hollow punch is used when you want to combine a 10 mm diameter with diameters 2, 3, 4, 5, 6, 7, 8 or 9 mm, which is impossible with the standard JLB10 hollow punch.

This hollow punch is locked onto a JLBM20, JLBM30PA, JLBM50PA, JLBM60PA and JLBM100 chuck by means of a pin system.

Made of high-strength treated steel. Boehm's JLB hollow punches allow precise cutting of pastilles and washers in soft materials: gasket paper, foam, cardboard, leather, felt, cork, rubber, plastic, fiber, etc.

This punch can be used manually by hammering on a JLBM20 chuck or a JLBM30PA and JLBM53PA handle. It can also be installed on a manual press with a JLBM50PA chuck. JLBM60PA or JLBM100. JLBM30PA and JLBM53PA handles can also be placed directly under a manual press.
